EXPERIENCE

Cybersecurity + AI Intern

Feb 2026 – Jun 2026

DRDO ADRDE, Agra

- Engineered preprocessing and feature engineering pipelines for an AI-driven next-generation firewall.
- Developed backend workflows for normalization, feature extraction, anomaly detection, and real-time traffic analysis.
- Integrated project modules, performed end-to-end testing, resolved integration issues, and packaged the application into a Windows installer for deployment.

PROJECTS

Transaction Processing Pipeline

GitHub

FastAPI, PostgreSQL, Redis, Celery, Docker, SQLAlchemy, Gemini API

- Built an asynchronous transaction processing platform using FastAPI, Celery, Redis, PostgreSQL, and SQLAlchemy to process large CSV uploads without blocking API requests.
- Implemented background task processing, AI-assisted transaction categorization, anomaly detection, Docker Compose deployment, and OpenAPI documentation for a production-style backend architecture.

BulletCraft AI

GitHub — Live

FastAPI, React, Python, Groq API

- Developed and deployed an AI-powered application that generates ATS-optimized resume bullets using LLM APIs and prompt engineering.
- Built a FastAPI backend, integrated the Groq API, and deployed the frontend on Vercel and backend on Render using RESTful APIs.

Trivoya Travels

GitHub — Live

Next.js, Django, PostgreSQL, REST APIs

- Developed a full-stack travel platform using Next.js and Django REST Framework with dynamic tour management and PostgreSQL-backed content storage.
- Designed SEO-friendly pages, REST APIs, and an admin dashboard enabling scalable content management and responsive user experience.

ACHIEVEMENTS

- 1st Place – TruthGuard, Sharda University AI & Cybersecurity Conclave 2025
- GirlScript Summer of Code 2026 – Selected Open Source Contributor
- Design Head – TechHood Agra Student Tech Community
- Smart India Hackathon (SIH) 2025 – Participant

CERTIFICATIONS

- Google Cloud Skill Badge – Cloud Engineering
- AWS Solutions Architecture Job Simulation – Forage
